

About Small Vessel Advisory and Forecast Services System (SVAS)

SVAS is an innovative impact-based advisory and forecast service for small vessels operating in Indian coastal waters.

It predicts potential overturning zones 10 days in advance using a Boat Safety Index (BSI), calculated from wave height, steepness, directional spread, and rapid wind-sea development.

Advisories are boat-specific and issued based on the beam width category: less than 4m, 6m, and 7m, covering all fishing vessel types across 9 coastal Indian states and union territories.

Popular Boat Categories and Beam Widths Across Coastal States

State	Beam Width	Boat Category
Gujarat	5–6 m	Trawls
	4.5–5 m	Gill netters
	2.5–3 m	Dol Net Systems
Maharashtra	4.8–5 m	Trawls
	2.1 m	Purse Seiners
	3.5 m	Gill netters
	3.5–4 m	Hook and Line
	2.5 m	Dol Net Systems
Goa	4–4.5 m	Trawls
	4–6.5 m	Purse Seiners
	4–4.5 m	Gill netters
Karnataka	5 m	Trawls
	4–4.5 m	Purse Seiners
Kerala	5.5 m	Trawls
	6 m	Purse Seiners
	4–4.5 m	Ring Seine
	4–6 m	Gill netters
	5.5 m	Hook and Line
Tamil Nadu	5.5 m	Trawls
	4–5.5 m	Gill netters
	5.5 m	Hook and Line
Andhra Pradesh	5 m	Trawls
	4.5–5 m	Gill netters
	4.5–5 m	Hook and Line

State	Beam Width	Boat Category
Odisha	4–5.5 m	Trawls
	4.5–5 m	Gill netters
West Bengal	4–5 m	Trawls
	4–5.5 m	Gill netters
